

Curbside Residential Waste Composition Study
Project No. PW-23-23

The Corporation of the Municipality of Mississippi Mills will receive proposals for this project before 2:00 p.m. on September 12th, unless modified by addendum, electronically by email as specified in the Request for Proposals.

The Municipality of Mississippi Mills is seeking proposals from qualified firms to complete a curbside residential waste composition study. The purpose of this study is to obtain a baseline of the waste stream for both rural and urban areas in the Municipality, assess the effectiveness of current programs, determine opportunities for improvement, and to have options recommended for future or expanded diversion programs.

The Request for Proposals document is available through MERX.

For further information please contact Zack Moshonas, Environmental Compliance Coordinator; zmoshonas@mississippimills.ca or 613-256-2064 x405.
