**Re: Phase One Environmental Site Assessment  
34 Victoria Street  
Almonte, Ontario**

---

Enclosed is our Phase One Environmental Site Assessment (ESA) report for the above noted property. The report presented herein is based on the scope of work discussed in the proposal dated February 5, 2025. This report was prepared by Mohit Bhargav, M.Sc.E., EIT, and reviewed by Daniel Elliot, B.Sc., P.Geo., QP<sub>ESA</sub>.

## EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by the Municipality of Mississippi Mills to carry out a Phase One Environmental Site Assessment (ESA) for the property located at 34 Victoria Street in Almonte, Ontario (herein referred to as the 'Site'). This Phase One ESA was completed in accordance with Ontario Regulation (O.Reg.) 153/04, as amended.

GEMTEC understands that this Phase One ESA is required for Site Plan Application. This Phase One ESA is not intended to support filing of a the Ministry of the Environment, Conservation and Parks (MECP) Record of Site Condition as a change in land use to a more sensitive use is not occurring.

The Site occupies an area of approximately 3,950 square metres (m<sup>2</sup>). This land parcel is undeveloped with no structures at the Site. A stream/municipal drain transects the Site from the east to the west.

The primary objective of this Phase One ESA was to identify any current and/or former potentially contaminating activities (PCAs) at the Site, as well as within the vicinity of the Site, to develop a preliminary determination of the likelihood of contamination in soil or groundwater which would result in the requirement of a Phase Two ESA. The general objectives were met through the evaluation of the information gathered from the records review, an interview, and a Site reconnaissance.

The available information was reviewed in a comprehensive manner starting with available historical information, followed by the results of the Site reconnaissance and finally the results of the interview. Several PCAs were identified. However, no Areas of Potential Environmental Concern (APECs) were identified at the Site. Based on the above-noted findings, a Phase Two ESA is not recommended at this time.

## 1.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by the Municipality of Mississippi Mills to carry out a Phase One Environmental Site Assessment (ESA) for the property located at 34 Victoria Street in Almonte, Ontario (herein referred to as the 'Site'). This Phase One ESA was completed in accordance with Ontario Regulation (O.Reg.) 153/04, as amended.

GEMTEC understands that this Phase One ESA is required for Site Plan Application. This Phase One ESA is not intended to support filing of a the Ministry of the Environment, Conservation and Parks (MECP) Record of Site Condition as a change in land use to a more sensitive use is not occurring.

Table 1.1 details the current land use of the Site, the adjacent properties, and other publicly accessible areas. The Site and the Phase One Study Area are shown in Figure A.1, Appendix A.

**Table 1.1: Current Land Use for the Site and Adjacent Properties**

Property Location	Civic Address	Property Land Use	Property Details
Site	34 Victoria Street	Undeveloped	<p>The Site consists of a land parcel with civic address of 34 Victoria Street. The Site occupies an area of approximately 3,950 square metres (m<sup>2</sup>). This land parcel is undeveloped with no structures at the Site. A stream/municipal drain transects the Site from the east to the west.</p> <p>The ground cover is primarily grass with tree cover across the Site.</p>
Northwest	321 Maude Street Maude Street	Residential Community	The Site is bound to the northwest by 321 Maude Street which has four structures with multiple residential units (each) followed by Maude Street.
Northeast	Menzie Road Residential	Community Residential	The Site is bound to the northeast by Menzie Road followed by residential properties along Honeyborne Street.
Southeast	Undeveloped Residential Commercial	Undeveloped Residential Commercial	The Site is bound to the southeast by pathway that connects St. James Street to Menzie Street. This pathway is followed by residential properties along St. James Street and a parking lot area at 352 Ottawa Street (along Ottawa Street).
Southwest	St. James Street Residential	Community Residential	The Site is bound to the southwest by St. James Street and residential properties along St. James Street and Vicotria Street.

The Phase One ESA was conducted by GEMTEC staff members whose qualifications are provided in Appendix B.

## 1.1 Site Information

The Site consists of a land parcel with civic address of 34 Victoria Street. The Site occupies an area of approximately 3,950 m<sup>2</sup>. This land parcel is undeveloped with no structures. A stream/municipal drain transects the Site from the east to the west. The ground cover is primarily grass with tree cover across the Site.

The Site features are shown on Figure A.1, Appendix A. The details for the Site are mentioned in Table 1.2.

**Table 1.2: Site Information**

Site Information	
Legal Description	Lt 31 Sec James PI 6262 Lanark N Ramsay; Lt 32 Sec James PI 6262 Lanark N Ramsay ; Town Mississippi Mills <sup>1</sup>
	and Lt 33 Sec James PI 6262 Lanark N Ramsay; Lt 34 Sec James PI 6262 Lanark N Ramsay; Lt 35 Sec James PI 6262 Lanark N Ramsay; Lt 36 Sec James PI 6262 Lanark N Ramsay ; Town Mississippi Mills
PIN <sup>1</sup>	05094-0065 (LT) <sup>1</sup> and 05094-0066 (LT)
Site Owner	Christopher Emerson <sup>1</sup> and Corporation of the Town of Almonte
Site Contact	Michel Asselin, P.Eng. Senior Development and Capital Projects Engineer

**Note:**

1. Current title search indicates that the Site is owned by two owners i.e., Christopher Emerson (dated 1919) and the Corporation of the Town of Almonte. However, based on the information provided by the Municipality of Almonte (on March 25, 2025), both the land parcels are owned by the Municipality of Mississippi Mills.

A copy of the current chain of title obtained from ERIS is available in Appendix C.

## 2.0 SCOPE OF THE INVESTIGATION

### 2.1 General Objectives

The Phase One ESA was conducted in accordance with O.Reg. 153/04, as amended. The objectives of the Phase One ESA were:

- To develop a preliminary determination of the likelihood of contamination in soil or groundwater by identifying and documenting current and historical environmental conditions and operations or practices at the Site; and,

- To determine if such operations or practices result in any Areas of Potential Environmental Concern (APECs) on the Site.

The general objectives were met through the evaluation of the information gathered from the records review and available documents, an interview, and a Site reconnaissance. Specific objectives for these components and the tasks completed to achieve these objectives are described in Section 2.2.

## **2.2 Records Review**

A review of information was conducted to identify actual or potential sources of contamination at the Site and within the Phase One Study Area from the following sources:

- Bedrock and Overburden Geology Maps – Overburden and bedrock geology maps, provided by Natural Resources Canada, were reviewed to identify the underlying soil deposits and bedrock types;
- Current Title Abstract – A current title abstract for the Site was obtained for ownership information. A copy of the title abstract is provided in Appendix C;
- Fire Insurance Maps and Insurance Reports – A copy of the Fire Insurance Maps and Insurance Reports is provided in Appendix D;
- Environmental Risk Information Services (ERIS) report – The ERIS report searches 73 public and private information databases to identify potential environmental concerns. An ERIS report was obtained for the Site and the Phase One Study Area. A copy of the ERIS Report is provided in Appendix E;
- City Directories – A City Directory Report was requested from ERIS for the Site and surrounding properties within the Phase One Study Area. A copy of the City Directory Report is provided in Appendix F;
- A records search was requested from the Technical Standards and Safety Authority (TSSA) for the Site. The TSSA search results are provided in Appendix G;
- Freedom of Information (FOI) - A FOI request for records for the Site was sent to the MECP in February 2025. FOI responses consist of information obtained from documents and records from the Ottawa District Office, Environmental Assessment and Permissions Division (EAPD), Environmental Monitoring and Reporting Branch (EMRB), Environmental Investigations and Enforcement Branch (EIEB) and Safe Drinking Water Branch (SDW). The response is provided in Appendix H;
- Google Earth® and National Air Photo Library (NAPL) Aerial Photographs – Aerial photographs from the years 1945, 1959, 1968, 1975, 1985, 1990, 2005, 2018, and 2023 were available for review. They were reviewed for the Site and the Phase One Study Area to identify APECs resulting from historical land uses. The aerial photographs can be found in Appendix I;

- Well Records - The MECP Well Records for the Site and the Phase One Study Area were reviewed;
- “Map of Federal Contaminated Sites Inventory” prepared by Treasury Board of Canada Secretariat was reviewed;
- “Ontario Inventory of PCB Storage Sites” dated January 1992 as prepared by Ontario Ministry of the Environment (Waste Management Branch) was reviewed; and,
- “Small Landfill Sites List” and “Large Landfill Sites List” as prepared by the Ontario MECP were reviewed.

## **2.3 Interview**

The objective of the interview was to assist in the identification of potentially contaminating activities (PCAs) that may have led to APECs at the Site. Mr. Cory Smith (Director of Roads and Public Works) was interviewed over the phone on March 24, 2025.

## **2.4 Site Reconnaissance**

The Site was visually assessed to document current conditions and to evaluate the potential for environmental impacts to on-Site soil, groundwater, and/or sediment. The Site was also inspected to identify if any possible preferential pathways such as underground utilities exist on the Site that may affect the fate, transport, and distribution of contaminants. Adjacent and neighbouring properties within the Phase One Study Area were assessed from publicly accessible boundaries to evaluate the potential for environmental impacts to the Site.

## **3.0 RECORDS REVIEW**

### **3.1 General**

#### **3.1.1 Phase One Study Area Determination**

The Site consists of a land parcel with civic address of 34 Victoria Street. The Site occupies an area of approximately 3,950 m<sup>2</sup>. This land parcel is undeveloped with no structures.

Prior to 1945, historical land use in the Phase One Study Area appeared to be predominately rural residential and agricultural. Between 1945 and 1985, land development can be seen within the Phase One Study Area. After 1985, the land use within the Phase One Study Area was primarily residential interspersed with community right of ways. The residential units along Maude Street were constructed sometime between 1990 and 2005.

Based on this information, a Phase One Study Area of 250 metres (m) surrounding the Site is deemed sufficient for the purpose of this Phase One ESA. The location of the Site and the extent of the Phase One Study Area are provided on Figure A.1, Appendix A.

### 3.1.2 First Developed Use Determination

The earliest available aerial photographs from 1945 shows the Site was undeveloped, appeared to be relatively flat, and potentially used for agricultural purposes. Other records associated with the Site and Site uses do not provide conclusive evidence of the existence of structures or PCAs on Site. Based on the available information and the definition of first developed use in O.Reg. 153/04, the Site has never been developed.

### 3.1.3 Fire Insurance Plans and Reports

A search of Fire Insurance Plans (FIP) and insurance reports was completed for the Site. FIPs from 1950 were identified for the Site and the Phase One Study Area. Upon review of the FIPs, no PCAs were identified. A copy of the Enviroscan Report is included in Appendix D.

### 3.1.4 Chain of Title

The legal description and the PIN for the land parcel for the Site is:

- Lt 31 Sec James PI 6262 Lanark N Ramsay; Lt 32 Sec James PI 6262 Lanark N Ramsay; Town Mississippi Mills, PIN: 05094-0065 (LT); and,
- Lt 33 Sec James PI 6262 Lanark N Ramsay; Lt 34 Sec James PI 6262 Lanark N Ramsay; Lt 35 Sec James PI 6262 Lanark N Ramsay; Lt 36 Sec James PI 6262 Lanark N Ramsay; Town Mississippi Mills; 05094-0066 (LT).

*Current title search indicates that the Site is owned by two owners i.e., Christopher Emerson (dated 1919) and the Corporation of the Town of Almonte. However, based on the information provided by the Municipality of Almonte (on March 25, 2025), both the land parcels are owned by the Municipality of Mississippi Mills.*

A copy of the current chain of title obtained from ERIS is available in Appendix C.

### 3.1.5 Historical Reports

No historical reports were available for GEMTEC to review.

## 3.2 Environmental Source and Regulatory Information

### 3.2.1 ERIS Database Report

GEMTEC contacted ERIS to conduct a search of 73 public and private information databases for the Site and the Phase One Study Area. No records were identified on the Site. A total of 56 records were identified in the Phase One Study Area and are summarized as follows:

- Certificates of Approval (CA) – 3 records.
- Environmental Activity and Sector Registry (EASR) – 1 record.
- Environmental Compliance Approval (ECA) – 8 records.
- ERIS Historical Searches (EHS) – 5 records.

- Fuel Storage Tanks (FST) – 5 records.
- Fuel Storage Tanks – Historic (FSTH) – 2 records.
- Ontario Regulation 347 Waste Generators Summary (GEN) – 8 records.
- TSSA Historic Incidents (HINC) – 2 records.
- Pesticide Register (PES) – 8 records.
- Permit to Take Water (PTTW) – 1 record.
- Retail Fuel Storage Tanks (RST) – 2 records.
- Ontario Spills (SPL) – 3 records.
- Water Well Information System (WWIS) – 8 records.

All listings were reviewed, and the salient records are provided in Table 3.1. The complete ERIS report, including a list of databases searched, is provided in Appendix E.

**Table 3.1: Summary of ERIS report**

Address/ Location	Distance from Site	Company/ Name	Database	Record Description	PCA ID
309 Victoria Street	60 m south	Ottawa River Power Corporation	SPL	SPL – 50 litre (L) of hydraulic oil was reportedly leaked and contained in 2018.	OT.1
365 Ottawa Street	130 m east	Hwy 44 Gas & Variety Store  Francis Fuel	SPL, RST, FSTH, FST	Listed a retail fuel outlet with four single walled underground storage tanks (USTs) with 25,000 L capacity each, installed in 1988; listed for a 20 L spill in 1994.	28, OT.1

**Notes:**

28. Gasoline and Associated Products Storage in Fixed Tanks

OT.1 – Listed for a spill

It should be noted that the activity/operation/record (as mentioned in ERIS Report) are associated with the land parcels and not with the exact location of the activity/operation/record at the respective land parcels. The 'Distance from Site' was measured based on the distance between the Site boundary and boundary of the land parcel of the ERIS record.

A total of 14 unplottable records were identified in the ERIS report. After the review of the unplottable records, GEMTEC determined that none of the records were environmentally significant for the Site or Phase One Study Area.

### 3.2.2 City Directory

A review, of the city directories, from 2000 to 2023, was completed for the Site and the Phase One Study Area. A copy of the City Directory records is provided in Appendix F. All records were reviewed and a description of identified PCAs is in Table 3.2.

**Table 3.2: Summary of City Directory**

Address/Location	Distance from Site	Description	PCA ID
365 Ottawa Street	130 m east	Hwy 44 Gas & Variety Store	28

**Note:**

28. Gasoline and Associated Products Storage in Fixed Tanks

### **3.2.3 Technical Safety and Standards Association**

The Technical Standards and Safety Authority (TSSA) was contacted in February 2025, and record research revealed that there were no records of tanks present on the Site. The TSSA search results are provided in Appendix G.

It should be noted that the Fuels Safety Division of the TSSA did not register private fuel underground storage tanks (USTs) or ASTs prior to January of 1990 or furnace oil tanks prior to May 1, 2002.

### **3.2.4 Freedom of Information (FOI)**

A FOI request for records on the Site was sent to the MECP in March 2025. A response, from MECP, indicated that no records were available for the Site. The copy of the response letter is provided in Appendix H.

### **3.2.5 Mapping of Federally Contaminated Sites**

A Government of Canada, Treasury Board of Canada Secretariat, interactive map illustrating the database of over 4,000 federally contaminated sites was reviewed. The database did not identify any federally owned contaminated sites within the Phase One Study Area.

### **3.2.6 Ontario Inventory of PCB Storage Sites**

The Waste Management Branch of the Ontario MECP published a report titled “Ontario Inventory of PCB Storage Sites” in October 1991. The publication includes information of PCB storage sites collected under O.Reg. 11/82 through MECP district and regional offices. The database did not identify any PCB storage sites located on the Site or within the Phase One Study Area.

### **3.2.7 Landfills**

The Ontario MECP published maps entitled “Small Landfill Sites List” and “Large Landfill Sites Map” published March 2014 – Updated October 2021. The publication includes information to identify old landfill sites for potential environmental considerations within the boundary of the province of Ontario. No landfills were identified at the Site or within the Phase One Study Area.

## **3.3 Physical Setting Sources**

### **3.3.1 Aerial Photographs**

Selected aerial photographs were examined as part of this Phase One ESA. The copies of the aerial photographs are provided in Appendix I.

Aerial photographs were obtained at regular intervals and were selected based on suitable scales for analysis and coverage area. The earliest aerial photograph obtained was from 1945. Observations made with respect to the selected aerial photographs are discussed in Table 3.3.

**Table 3.3: Summary of Aerial Photograph Review**

Date	Photograph Source	Observations
1945	NAPL	<p>The Site was undeveloped, appeared to be relatively flat, and potentially used for agricultural purposes.</p> <p>The land use within the Phase One Study Area appeared to be predominately agricultural and rural residential. Rural residential properties were visible to the south of the Site in the Phase One Study Area. A roadway, present at the current footprint of Victoria Street, was also visible.</p>
1959	NAPL	<p>Ground disturbance was visible in the northern portion of the Site which was likely related to the agricultural field to the north of the Site.</p> <p>A roadway, present at the current footprint of St. James Street, was also visible. A structure was developed to the east/southeast of the Site along Ottawa Street. No significant changes were noted for the properties to the south of the Site.</p>
1968	NAPL	<p>A stream/municipal drain was first visible transecting the Site from the east (from Ottawa Street) to the west (towards Maude Street) in 1968. However, it should be noted that Maude Street was not constructed sometime until 2005.</p> <p>No significant changes were noted for the Phase One Study Area.</p>
1975	NAPL	The photo resolution is poor, however, no significant changes were noted for the Site and the Phase One Study Area.
1985	NAPL	No significant changes were noted for the Site and the Phase One Study Area.
1990	NAPL	No significant changes were noted for the Site and the Phase One Study Area. The retail fuel outlet (Francis Fuel) at 365 Ottawa Street was constructed sometime between 1985 and 1990.
2005	Google Earth	<p>No significant changes were noted for the Site.</p> <p>Maude Street and residential properties along Maude Street were constructed sometime between 1990 and 2005.</p>
2019	Google Earth	No significant changes were noted for the Phase One Study Area. Ground disturbance was visible in the southern portion of the Site because it was used as a staging area for the reconstruction of St. James Street/Victoria Street.
2021	Google Earth	No significant changes were noted for the Site and the Phase One Study Area.
2024	Google Earth	No significant changes were noted for the Site and the Phase One Study Area.

One PCA was identified based on the review of aerial photographs:

- 28. Gasoline and Associated Products Storage in Fixed Tanks.

### **3.3.2 Topography and Hydrogeology**

The Site has a relatively flat topography and is at an elevation ranging of approximately 130 m above sea level (asl). The topography at the Site slopes centrally towards the stream/municipal drain which transects the Site from the east to the west. The local topography of the Phase One Study Area gradually slopes south/southwest towards the Mississippi River which is located approximately 750 m south/southwest of the Site.

Groundwater flow often reflects topographic features and typically flows towards nearby lakes, rivers, and wetland areas. Based on the topography and hydrogeological features, it is anticipated that local shallow and regional groundwater would flow south/southwest towards the Mississippi River.

### **3.3.3 Surficial and Bedrock Geology**

Based on a review of published geology maps, the Site is mapped as Paleozoic bedrock at surface. Shallow bedrock is composed of dolostone and sandstone of Beekmantown Group. The bedrock surface is expected at depths ranging between 1 and 2 m below ground surface (bgs).

### **3.4 Fill Materials**

No evidence of stockpiled fill material was observed at the Site.

### **3.5 Waterbodies and Areas of Natural Significance**

No provincially significant wetlands (PSWs) or areas of natural and scientific interest (ANSIs) were identified on the Site or within the Phase One Study Area. An unevaluated wetland was identified approximately 120 m north/northwest of the Site. The Mississippi River is located approximately 750 m south/southwest of the Site.

### **3.6 Well Records**

Well records were reviewed for the Site and the Phase One Study Area. Well records were available through the MECP. Based on the review of the well records, no wells were present at the Site. Seven wells were identified in the Phase One Study Area. Two of the wells were domestic water wells, and the remaining were installed in proximity of 385 Ottawa Street indicating groundwater monitoring activities for a Phase II ESA (completed by exp Services Inc. in April 2012).

### **3.7 Site Operating Records**

The Site is undeveloped, and no structures are currently present. Additionally, no manufacturing or processing activities and operations were conducted at the Site. No information or site operating records are considered applicable to the Site.

## **4.0 INTERVIEW**

Mr. Cory Smith was interviewed over Microsoft Teams by the GEMTEC Site assessor on March 25, 2024. Mr. Smith is Director of Roads and Public Works with the Municipality of Mississippi Mills. No other individuals were interviewed.

Mr. Smith indicated the following:

- He has approximately 15 years of knowledge about the Site;
- The Site will be developed into a daycare facility and a residential building for affordable housing;
- No structures have ever been present on the Site and no manufacturing activities were conducted at the Site;
- No oil tanks were present at the Site;
- No spills have occurred at the Site;
- No fill material was brought to the Site;
- Indicated that a stream/municipal drain transects the Site from the east to the west;
- The ground cover has primarily been grassed with tree cover;
- Stormwater is expected to infiltrate ground surface or flow towards the stream/municipal drain that transects the Site;
- No wastewater is generated from the Site;
- The Site is not serviced by municipal services;
- Confirmed that the Site is owned by the Municipality of Almonte and not by an individual owner;
- Confirmed that the ground disturbance noted in the southern portion of the Site along Victoria Street is associated with the staging area constructed for the reconstruction of Victoria Street/St. James Street;
- The land use around the Site has been primarily residential; and,
- No environmental investigations have been conducted for the Site in the past.

### **4.1 Assessment and Evaluation of Interview**

The interview with Mr. Cory Smith is consistent with historical records and other information sources.

## 5.0 SITE RECONNAISSANCE

### 5.1 General Requirements

A Site reconnaissance was carried out on March 5, 2025. The weather at the time of Site reconnaissance was rainy and overcast with a temperature of approximately -2 °C.

The Site reconnaissance was completed by Mr. Mohit Bhargav, M.Sc.E., EIT. The Site reconnaissance was completed to determine if there were visually observable environmental concerns with the Site and/or surrounding properties within the Phase One Study Area.

### 5.2 Site Photographs

Photographs of the Site were taken during the Site reconnaissance to document the general condition of the Site. The relevant photographs are presented in Appendix J. A description of the photographs is summarized in Table 5.1.

**Table 5.1: Summary of Site Photographs**

Photo Number	Compass Orientation	Description
J1	Southeast	Looking southeast along Victoria Street. The Site is to the left.
J2	Southwest	Looking southwest from the intersection of Victoria Street and St. James Street.
J3	Northwest	Looking northwest along Victoria Street. The Site is to the right.
J4	Northeast	Looking northeast from Victoria Street. Looking at the pathway which adjoins the Site boundary to the east. A natural gas line runs along Victoria Street.
J5	Northeast	Looking northeast. The Site is to the left and the residential properties along Maude Street can be seen in the background to the left.
J6	Northeast	Looking northeast. The Site is to the left.
J7	Northwest	Looking northwest from the Site towards residential properties at 321 Maude Street.
J8	Northwest	Looking northwest towards the Site.
J9	Northeast	Looking northeast towards the stream/municipal drain that transects the Site.
J10	East	Looking east towards a transformer station located at Victoria Street.
J11	Southwest	Looking southwest at the Site from Menzie Street.
J12	Southeast	Looking southeast along Menzie Road.

Photo Number	Compass Orientation	Description
J13	East	Looking east from the intersection of Ottawa Street and Menzie Street towards retail fuel outlet located at 365 Ottawa Street.

Two PCAs were identified based on the Site reconnaissance:

- 28. Gasoline and Associated Products Storage in Fixed Tanks; and,
- 55. Transformer Manufacturing, Processing and Use

### 5.3 Specific Observations at the Site

#### 5.3.1 On-Site Structures

The Site has a civic address of 34 Victoria Street. The Site occupies an area of approximately 3,950 m<sup>2</sup>. The Site is undeveloped and no structures are present.

#### 5.3.2 Observations

The following observations were made for the Site.

- The Site has no structures;
- The Site is undeveloped;
- The ground cover is primarily grassed with tree cover;
- A stream/municipal drain transects the Site; and,
- No stressed vegetation or staining was identified at the Site; however, ground visibility was limited because of snow cover.

#### 5.3.3 Site Services

The Site is not serviced by municipal services.

#### 5.3.4 Water, Wastewater and Stormwater

The adjacent properties were assumed to be provided with municipal water and municipal sewer. However, the Site is not serviced by municipal services. No wastewater is generated from the Site. The stormwater is expected to infiltrate ground surface or flow towards the stream/municipal drain that transects the Site.

#### 5.3.5 Pits, Ponds, and Lagoons

No pits, ponds or lagoons were observed at the time of the Site reconnaissance. No signs of staining, odors, or oil sheen was noted at the Site; however, ground visibility was limited because of snow cover.

### 5.3.6 Stained Materials and Stressed Vegetation

No signs of stained material or stressed vegetation were observed at the time of Site reconnaissance; however, ground visibility was limited because of snow cover.

### 5.3.7 Watercourses, Ditches or Standing Water

No drainage ditches or standing water was identified at the Site. A stream/municipal drain transects the Site from the east to the west. An unevaluated wetland was identified approximately 120 m north/northwest of the Site. The Mississippi River is located approximately 750 m south/southwest of the Site.

### 5.3.8 Unidentified Substances

No unidentified substances were observed on the Site during the Site reconnaissance.

### 5.3.9 Odours

No odours were identified on the Site during the Site reconnaissance.

### 5.3.10 Enhanced Investigation Property

The Site is currently undeveloped, and no structures are present at the Site. Historically, no industrial activities have occurred at the Site. As such, the Site is not considered an enhanced investigation property.

### 5.3.11 Surrounding Properties

Adjacent properties were viewed from the Site and publicly accessible boundaries to assess the potential for uses to adversely affect the Site. Table 5.2 summarizes the findings.

**Table 5.2: Summary of Surrounding Properties**

Property Location	Civic Address	Property Land Use	Property Details
Northwest	321 Maude Street Maude Street	Residential Community	The Site is bound to the northwest by 321 Maude Street which has four structures with multiple residential units (each) followed by Maude Street.
Northeast	Menzie Road Residential	Community Residential	The Site is bound to the northeast by Menzie Road followed by residential properties along Honeyborne Street.
Southeast	Undeveloped Residential Commercial	Undeveloped Residential Commercial	The Site is bound to the southeast by pathway that connects St. James Street to Menzie Street. This pathway is followed by residential properties along St. James Street and a parking lot area at 352 Ottawa Street (along Ottawa Street).

Property Location	Civic Address	Property Land Use	Property Details
Southwest	St. James Street Residential	Community Residential	The Site is bound to the southwest by St. James Street and residential properties along St. James Street and Vicotria Street.

#### 5.4 Site Reconnaissance Limitations

One limitation was noted at the time of Site reconnaissance. Ground visibility was limited because of snow cover. This limitation is not expected to affect the overall conclusions of this Phase One ESA.

### 6.0 REVIEW AND EVALUATION OF INFORMATION

#### 6.1 Current and Past Uses

Currently the Site is undeveloped, and no structures are present at the Site. Based on the review of available records (aerial photograph from 1945), the Site is undeveloped since at least 1945.

#### 6.2 Potentially Contaminating Activities

Several PCAs were identified based on review of available information. A summary of the PCAs as outlined on Table 2 in Schedule D of O.Reg. 153/04 and identified in this Phase One ESA are provided in Table 6.1. The locations of the PCAs are shown on Figure A.2, Appendix A.

**Table 6.1: Summary of Potentially Contaminating Activities**

PCA ID	Address/ Location	Distance from Site	Information source	PCA Description	Rationale
55, OT.1	309 Victoria Street	60 m south	ERIS, Site reconnaissance	Transformer Station 50 L of hydraulic oil was reportedly leaked and contained in 2018	<i>Based on the distance from the Site, anticipated groundwater flow direction and the listed year of spill, this record/incident/activity has a low potential for impacts at the Site.</i>
28, OT.1	365 Ottawa Street	130 m east	ERIS, CD, Aerial Photograph, Site reconnaissance	Retail Fuel Outlet 20 L spill in 1994	<i>Based on the distance from the Site, the volume of spill, and the listed year of spill, this record/incident/activity has a low potential for impacts at the Site.</i>

**Notes:**

28 – Gasoline and Associated Products Storage in Fixed Tanks

55 – Transformer Manufacturing, Processing and Use

OT.1 – Listed for a spill

### 6.3 Areas of Potential Environmental Concern

GEMTEC identified no APECs on the Site.

#### 6.3.1 Discussion of Uncertainty

Mr. Cory Smith (Director of Roads and Public Works with the Municipality of Mississippi Mills) was interviewed on March 25, 2025. The interview with Mr. Cory Smith is consistent with historical records and other information sources. Mr. Cory Smith provided information related to the Site to the best of his knowledge.

### 6.4 Phase One Conceptual Site Model

The Phase One Conceptual Site Model (CSM) describes the nature and extent of potential contaminants on the Site. The Phase One CSM is summarized in Sections 6.4.1 through 6.4.11 and the figures included in Appendix A, as outlined in Table 6.2.

**Table 6.2: Summary of Conceptual Site Model Figures**

Conceptual Model Detail	Figure
Roads, Adjacent Property Uses, Water Bodies, Areas of Natural Significance, Wetlands, MECP Water Wells	Figure A.1: Site and Phase One Study Area
Potentially Contaminating Activities	Figure A.2: Potentially Contaminating Activities

#### 6.4.1 Site Description

The Site consists of a land parcel with civic address of 34 Victoria Street. The Site occupies an area of approximately 3,950 m<sup>2</sup>. This land parcel is undeveloped, and no structures are present. The ground cover is primarily grass with tree cover.

The earliest available aerial photographs from 1945 shows the Site was undeveloped, appeared to be relatively flat, and potentially used for agricultural purposes. The Site has never been developed since at least 1945. Based on the available information and the definition of first developed use in O.Reg. 153/04, the Site has never been developed.

#### 6.4.2 Subsurface Structures and Utilities

There is low potential for underground utilities to affect contaminant transport on or to the Site if contaminants are present. No other subsurface structures/utilities are understood to be present at the Site.

#### 6.4.3 Current and Proposed Future Site Use

Currently the Site is undeveloped and there are no structures. The future use is understood to be a daycare facility and a residential building for affordable housing.

#### 6.4.4 Topography, Hydrology and Geology

The Site has a relatively flat topography and is at an elevation ranging of approximately 130 m asl. The topography at the Site slopes centrally towards the steam/municipal drain which transects the Site from the east to the west. The local topography of the Phase One Study Area gradually slopes south/southwest towards the Mississippi River which is located approximately 750 m south/southwest of the Site.

Groundwater flow often reflects topographic features and typically flows towards nearby lakes, rivers, and wetland areas. Based on the topography and hydrogeological features, it is anticipated that local shallow and regional groundwater would flow south/southwest towards the Mississippi River.

Based on a review of published geology maps, the Site is mapped as Paleozoic bedrock at surface. Shallow bedrock is composed of dolostone and sandstone of Beekmantown Group. The bedrock surface is expected at depths ranging between 1 and 2 m below ground surface (bgs).

#### 6.4.5 Waterbodies and Areas of Natural and Scientific Interest

No PSWs or ANSIs were identified on the Site or within the Phase One Study Area. An unevaluated wetland was identified approximately 120 m north/northwest of the Site. The Mississippi River is located approximately 750 m south/southwest of the Site.

#### 6.4.6 Well Records

Well records were reviewed for the Site and the Phase One Study Area. Well records were available through the MECP. Based on the review of the well records, no wells were present at the Site. Seven wells were identified in the Phase One Study Area. Two of the wells were domestic water wells, and the remaining were installed in proximity of 385 Ottawa Street indicating groundwater monitoring activities for a Phase Two ESA.

#### 6.4.7 Potentially Contaminating Activities

Several PCAs were identified based on review of available information. A summary of the PCAs as outlined on Table 2 in Schedule D of O.Reg. 153/04 and identified in this Phase One ESA are provided in Table 6.3. The locations of the PCAs are shown on Figure A.2, Appendix A.

**Table 6.3: Summary of Potentially Contaminating Activities**

PCA ID	Address/ Location	Distance from Site	Info source	PCA Description	Rationale
55, OT.1	309 Victoria Street	60 m south	ERIS, Site recon	Transformer Station 50 L of hydraulic oil was reportedly leaked and contained in 2018	<i>Based on the distance from the Site, anticipated groundwater flow direction and the listed year of spill, this record/incident/activity has a low potential for impacts at the Site.</i>

PCA ID	Address/ Location	Distance from Site	Info source	PCA Description	Rationale
28, OT.1	365 Ottawa Street	130 m east	ERIS, CD, Aerial Photo, Site recon	Retail Fuel Outlet 20 L spill in 1994	<i>Based on the distance from the Site, the volume of spill, and the listed year of spill, this record/incident/activity has a low potential for impacts at the Site.</i>

**Notes:**

28 – Gasoline and Associated Products Storage in Fixed Tanks

55 – Transformer Manufacturing, Processing and Use

OT.1 – Listed for a spill

#### 6.4.8 Areas of Potential Environmental Concern (APECs)

The available information was reviewed starting with available historical information, followed by the results of the Site reconnaissance and finally the results of the interview. Based on the PCAs identified within the Phase One Study Area, GEMTEC did not identify any APECs at the Site.

#### 6.4.9 Uncertainty and Absence of Information

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the findings of this Phase One ESA.

### 7.0 CONCLUSIONS AND RECOMMENDATIONS

#### 7.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, no APECs were identified at the Site. As such, a Phase Two ESA is not recommended at this time.

## 9.0 LIMITATIONS OF LIABILITY

The Phase One Environmental Site Assessment has been supervised and reviewed the Qualified Person. This Phase One ESA was carried out in general with Ontario Regulation 153/04 made under the Environmental Protection Act and meets the requirements of Part VII (Sections 23 to 31) and Schedule D of the regulation.

The results of this Phase One ESA should in no way be construed as a warranty that the Site is free from any and all contaminants other than those noted in this report, nor that all compliance issues have been addressed.

This report was prepared for the exclusive use of the Municipality of Mississippi Mills and is based on data and information collected during the Phase One ESA of the Site conducted by GEMTEC. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC and the Municipality of Mississippi Mills. In evaluating this Site, GEMTEC has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others.

The assessment of environmental conditions and possible site hazards presented has been made using the available historical and technical data collected and provided by others. The conclusions provided herein represent the best judgment of GEMTEC based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Site was carried out as part of this Phase One ESA. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the Site and does not constitute a complete assessment of the adjacent sites.

## 10.0 CLOSURE

The undersigned Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

Sincerely,

Mohit Bhargav, M.Sc.E., EIT  
Environmental Scientist

Daniel Elliot, B.Sc., P.Geo., QPESA  
Senior Environmental Geoscientist

## **APPENDIX B**

### Qualification of Assessors

## **QUALIFICATION OF ASSESSORS**

### **Mohit Bhargav, M.Sc.E., EIT – Environmental Scientist**

The primary assessor for this Assessment of Past Uses (APU) was Mr. Mohit Bhargav, Junior Environmental Scientist with GEMTEC. Mohit has Master of Science Civil Engineering with a specialization in water/wastewater treatment. Mr. Bhargav's formal education and work experience in environmental consulting with GEMTEC has provided him with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

### **Daniel Elliot, B.Sc., P.Geo., QP<sub>ESA</sub> – Senior Environmental Geoscientist**

The Phase One ESA was carried out under the oversight of Mr. Daniel Elliot. Daniel has over 15 years of experience in the environmental sector in jurisdictions across Canada and the United States. His early career with the Morwick G360 Groundwater Research Institute saw him carrying out research projects developing and using cutting edge techniques and technology. Since moving into consulting, he has gained extensive experience providing various environmental services including Phase One and Two Environmental Site Assessments, contaminant and hydrogeological site characterization, remedial planning, and implementation; risk assessment; filing of Records of Site Conditions; compliance and contract support; and waste and excess soil characterization/management. Daniel is a practicing member of the Association of Professional Geoscientists of Ontario and is a "qualified person" under Ontario Regulation 153/04 and Ontario Regulation 406/19.

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

**Government Publication Date: Up to Nov 2024**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Apr 2024**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Apr 30, 2024**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2022**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Apr 30, 2024**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -May 2024**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2024**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Dec 31, 2024**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Aug 2024****Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Oct 2023****Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011-Oct 31, 2024****Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Dec 31, 2024****Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Oct 31, 2024****Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 31, 2024****Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2023

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Nov 2024

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** Oct 31, 2021

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Oct 2023

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Nov 30, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Apr 2024**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: 31 Oct, 2023**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 31, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2024**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2022**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Nov 2023**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2024**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Feb 2024****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2024****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-Aug 2024****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Dec 31, 2024**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011-Oct 31, 2024

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug 2024; Oct-Nov 2024

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date:** Feb 2024

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date:** Feb 2024

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Dec 31, 2024

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2021

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Jan 2025

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Apr 30, 2024

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug 2024; Oct-Nov 2024

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date:** 1990-Dec 31, 2021

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date:** 1915-1953\*

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date:** 1970 - Apr 2024

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERI's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011 - Oct 31, 2024**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERI's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Dec 31 2023**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## **APPENDIX F**

RE: CITY DIRECTORY RESEARCH  
Victoria St  
Mississippi Mills, ON

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

All of Florence Street S  
0-45 of Harold Street  
390-505 of Honeyborne Street  
0-25 of Horton Street  
0-10 of Houston Drive  
0-10 Even of Industrial Drive  
All of Laroque Street  
245-335 of Maude Street  
All of McDermott Street  
All of Menzie Street  
245-425 of Ottawa Street  
0-45 of Paterson Street  
100-145 of Sadler Drive  
All of St James Street  
245-315 of Victoria Street

**Search Notes:**

Almonte, ON is last listed in 2000

**RE: TSSA search - Fuels Database**

---

**From** Public Information Services <publicinformationsservices@tssa.org>

**Date** Tue 2/4/2025 8:19 AM

**To** Mohit Bhargav <mohit.bhargav@gemtec.ca>

**NO RECORD FOUND IN CURRENT DATABASE**

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](#) to complete an Application for Release of Public Information.

Please refer to [How to Submit a Public Information Request \(tssa.org\)](#) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org).

Kind regards,

**Kimberly Gage | Public Information & Records Agent**

### Freedom of Information Records

March 4, 2025

Mr. Mohit Bhargav  
GEMTEC Consulting  
32 Steacie Drive  
Kanata, Ontario K2K 2A9  
mohit.bhargav@gemtec.ca

Dear Mohit Bhargav:

RE: **MECP FOI A-2025-01310, Your Reference 103619.002 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

34 Victoria Street, Almonte  
Timeframe: January 1, 1985 to February 28, 2025

After a thorough search through the ministry files, no records were located responsive to your request. The official responsible for making the access decision on your request is the undersigned. This file is now closed.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Roxanne Chambers at 807-456-3035 or [roxanne.chambers@ontario.ca](mailto:roxanne.chambers@ontario.ca).

Yours truly,

*Roxanne Chambers*

for

Josephine DeSouza  
Manager, Access and Privacy Office
