## 1.0 EXECUTIVE SUMMARY

*Toronto Inspection Ltd.* was retained by 2241497 Ontario Limited (the 'Client') to conduct a Phase One Environmental Site Assessment (Phase One ESA) for a property located at 430 Ottawa Street, Almonte (hereinafter referred to as the 'Site' or the 'Phase One Property'). The Phase One ESA was conducted in general accordance with Ontario Regulation 153/04, Records of Site Condition – Part XV.1 of the Environmental Protection Act, (O. Reg. 153/04 as amended). It is understood that this Phase One ESA was conducted as part of the requirements for a Site Plan Approval.

The objective of the Phase One ESA was to determine if there is evidence of actual or potential contamination as a result of the current and/or historical activities on Site or the surrounding properties that could result an adverse environmental impact on the Phase One Property.

The Phase One Property is a rectangular-shaped property located north of Ottawa Street and approximately 50 m east of Sadler Drive in Almonte, Ontario. The Phase One Property, with an approximate area of 2.5564 ha, is developed with a commercial building. Based on the records review, the Phase One Property was considered to have been first developed in the mid-2000s for commercial purposes.

Based on the local topography, the regional groundwater flow direction is inferred to be northwest towards Ottawa River located approximately 25 Km northwest of the Phase One Property. The closer water body to the Phase One Property is Mississippi River, located approximately 1 Km south of the Site. Mississippi River flows northwest and drains into Ottawa River. The surficial geology in the area was identified as Paleozoic bedrock. The bedrock geology under the Phase One Property consists of limestone, dolostone, shale, arkose and sandstone of the Ottawa Group; Simcoe Group; Shadow Lake Formation. The depth to the bedrock is unknown.

Three (3) potentially contaminating activities (PCAs) were identified within the Study Area; however, none of them were identified to create an Area of Potential Environmental Concern at the Phase One Property.

In summary, the historical and current activities from on-Site and off-Site properties, as identified at the time of this Phase One ESA, do not represent significant potential environmental concern which may adversely impact the subsurface conditions of the Phase One Property.

It is *Toronto Inspection Ltd.*'s opinion that at the time of writing this Phase One ESA report, based on a review of the available documents and information that no further action is recommended for the Phase One Property.

## 2.0 INTRODUCTION

Toronto Inspection Ltd. was retained by 2241497 Ontario Limited (the 'Client') to conduct a Phase One Environmental Site Assessment (Phase One ESA) for a property located at 430 Ottawa Street, Almonte (hereinafter referred to as the 'Site' or the 'Phase One Property'). The Phase One ESA was conducted in general accordance with Ontario Regulation 153/04, Records of Site Condition – Part XV.1 of the Environmental Protection Act, (O. Reg. 153/04 as amended). It is understood that this Phase One ESA was conducted as part of the requirements for a Site Plan Approval.

### 2.1. Objective

The Phase One ESA was conducted to determine if there is evidence of actual or potential contamination at the Site and if the activities of surrounding properties pose an environmental concern to the Site, for the purpose of satisfying the Phase One ESA general objectives as listed in O.Reg. 153/04:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the phase one property.
- To determine the need for a Phase Two ESA.
- To provide a basis for carrying out any Phase Two ESA if required.
- To provide adequate preliminary information about environmental conditions in the land or water on, in or under the phase one property for the conduct of a risk assessment following completion of a Phase Two environmental site assessment.

### 2.2. Phase One Property Information

**Site Description:** The Phase One Property is a rectangular-shaped property located north of Ottawa Street and approximately 50 m east of Sadler Drive in Almonte, Ontario. The Phase One Property occupied by a commercial plaza and it is described as follows:

**Table 2.2-1: Summary of Phase One Property Information**

General Information	Description
Address	430 Ottawa Street, Almonte
Property Identification Number (PIN)	05089-0147 LT
Legal description	Ramsay Con 10 PT Lot 16 RP 27R8445 Parts 1 to 4 9 to 11 RP 27R8990 Parts 1 Mississippi Mills Municipality
Current land use	Commercial
Current occupant	Retail Mall – Rexall & Pet Value
Ownership	2241497 Ontario Limited
Current zoning	Shopping Centre Commercial (C4)
Proposed land use	Mixed land Use
Property coordinates (approximate centroid)	Zone 18T 407115m E 5009814m N
Approximate area of Site	2.5564 ha

The layout of the Site is shown on Image 1, below.

Source: Google Earth Pro (2021)

**Site Contact Information:** Mr. David Osypowich, the owner of the Phase One Property, provided authorization for *Toronto Inspection Ltd.* to conduct this Phase One ESA. The client's contact information is provided below:

Contact: David Osypowich  
Tel: 416-624-3465  
Email: [d.osypowich@elmdevelopments.com](mailto:d.osypowich@elmdevelopments.com)

### 3.0 SCOPE OF INVESTIGATION

#### 3.1. Scope of Work

The scope of work of this Phase One ESA consisted of:

- A review of reasonably accessible records pertaining to the current and/or past uses of the Site and properties within the Phase One Study Area.
- An inspection of the Site and accessible areas surrounding the Site to identify evidence of potential environmental concerns at the Site and within the Phase One Study Area.
- Interview(s) with person(s) having knowledge of on-Site activities and operations.
- Preparation of this report to document the findings of the Phase One ESA report.

#### 3.2. Methodology and Limitations

##### Methodology

This Phase One ESA was conducted in general accordance with O.Reg. 153/04 as amended.

Based on the general land use, topographical and hydrogeological conditions of the Site and surrounding areas, a search distance of 250 m from the Site was determined to be sufficient as the Phase One Study Area. For details refer to Section 4.1.1. *Phase One Study Area Determination*.

Information from various sources were searched and reviewed as part of the Phase One ESA work program. The source information was searched in accordance with Schedule D of O. Reg. 153/04 as amended. A detail list of records reviewed is included in Section 9 – References. Copies of select source documents are included in the Appendices as references.

The Phase One Property is not defined as an Enhanced Investigation Property. Therefore, Site operating records that are applicable or specific for an industrial property, a commercial garage, a bulk liquid dispensing facility, or a dry-cleaning equipment operator were not included in this Phase One ESA.

The Phase One ESA site visit was conducted by Mr. Mamoon Herz-Khan, BES of *Toronto Inspection Ltd.* on March 5, 2021. The site visit included a walkthrough of the Phase One Property in all accessible areas to document site observations and photograph details pertinent to the Phase One ESA requirements.

##### Limiting Conditions of Phase One ESA

All accessible areas of the Phase One Property were inspected for evidence of potential environmental concern. An inspection of the adjacent properties was conducted from vantage points at the Phase One Property and other publicly accessible areas.

It should be noted that a response from the Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) office has yet to be received at the time this report was prepared.

## 4.0 RECORDS REVIEW

Records search was conducted to determine if area(s) of actual and potential environmental concern exist on the Phase One Property and within the Phase One Study Area. Details of the findings are provided in the following sections.

### 4.1. General

#### 4.1.1. Phase One Study Area Determination

As indicated from the records review, there were no large historical or recent industrial facilities within 1 km of the Phase One Property, which include: active or closed waste disposal sites, historical coal gasification plant waste sites, or historical industrial sites which produced or used coal tar and related tars.

Based on the general land use indicated above, as well as the topographical and hydrogeological conditions of the Phase One Property and surrounding areas, the Phase One ESA Study Area was established to comprise the Phase One Property as well as properties located, in whole or in part, within 250 m of the site boundaries. The Regional Topography and the Site Location are shown on Figure No. 1, Appendix A.

#### 4.1.2. First Developed Use Determination

According to the 1954 aerial photograph the Phase One Property was part of agricultural fields and no evidence of development was observed on Site. Reportedly, the Subject Building was developed in the mid-2000s to be used for commercial purposes.

#### 4.1.3. Fire Insurance Plans

Access to the fire insurance plans for the Site and Study Area was not possible due to the closure of Government buildings at the time of writing this report (as a result of COVID-19). Once these records become accessible, they will be reviewed and assessed. The client will be notified of any information of relevance, if identified during the supplemental review.

#### 4.1.4. Chain of Title

A chronological chain of title for the Phase One Property was not provided to *Toronto Inspection Ltd.* for review. This is considered unlikely to significantly affect this investigation given that information from other source documents satisfies the objectives of the records review. In case of filling a Record of Site Condition, it is recommended that a chain of title be obtained.

#### 4.1.5. City Directory

Access to the city directories for the Site and Study Area was not possible due to the closure of Government buildings at the time of writing this report (as a result of COVID-19). Once these records become accessible, they will be reviewed and assessed. The client will be notified of any information of relevance, if identified during the supplemental review.

#### 4.1.6. Environmental Reports and Other Reports

No environmental report and other reports were available to *Toronto Inspection Ltd.* for review.

### 4.2. Environmental Source Information

#### 4.2.1. MECP Inventory Records

The following documents were reviewed:

- MOE Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987
- MOE Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, November 1998
- MOE Waste Disposal Site Inventory, June 1991
- MOE Inventory of PCB Storage Sites, January 1992

A review of the above-listed documents indicated that no active or closed waste disposal sites, historical coal gasification plant waste sites, or historical industrial sites which produced or used coal tar and related tars, were located within 1 km of the Site.

#### 4.2.2. Environmental Risk Information Service (ERIS)

*Toronto Inspection Ltd.* ordered a report from ERIS Ltd. for the Site and Phase One Study Area. The ERIS Report includes the search results of federal, provincial, and private source databases that are listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04 as amended. The ERIS report identified six (6) records for the Phase One Property and ninety-seven (97) records within the Study Area. Potential environmental concerns associated with the records presented by ERIS area presented on Table 7.2.1 of this this Phase One ESA report.

A copy of the ERIS Report is included as Appendix B.

#### 4.2.3. Government and Regulatory Agency Records

##### MECP FOI

A request enclosed in Appendix C was submitted on March 4, 2021 to the Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) and Privacy Office by *Toronto Inspection Ltd.* for records pertaining to the Site. A response has not been received from the MECP at the time of writing of this report. Upon receipt of MECP's response, *Toronto Inspection Ltd.* will review the information and forward to the client any environmentally significant information (if found) under a separate cover. The conclusions of this report may be amended based on the information provided by MECP.

##### TSSA

Technical Standards & Safety Authority (TSSA) was contacted to check their records for any fuel storage tanks that may have been present at the Site and the surrounding properties. An email correspondence (attached in Appendix E) from a TSSA representative, indicated that no fuel storage tank records were identified for the Site or surrounding areas.

## MNRF

Based on information provided on the Ministry of Natural Resources and Forestry (MNRF) on-line application “Make A Map: Natural Heritage Areas”, the Phase One Property is not located within or adjacent to an area of natural and scientific interest (ANSI), or within a provincially significant wetland; however, a woodland area was identified adjacent to the Phase One Property to the northeast.

## MUNICIPALITY OF MISSISSIPPI MILLS

According to the Municipality of Mississippi Mills Community Map, adjacent areas to the Phase One Property are composed by residential and commercial areas, no area of natural significance (ANSI), significant woodlands and wetlands were identified within the Phase One Property. The land usage of areas surrounding the Phase One Property are shown in Figure No4, Appendix A.

### 4.2.4. Client File Information

The Client provided *Toronto Inspection Ltd.* with the following documents:

- A Survey Plan entitled “Plan of Part of Lot 16 Concession 10 Geographic Township of Ramsay now Town of Mississippi Mills County of Lanark”. The survey was completed by David W. Woodland on November 29, 2007.
- Municipal Property Assessment Corporation (MPAC), issue date: November 12, 2019 to 2241497 Ontario Limited.

The Survey Plan and the MPAC are included in Appendix E.

## 4.3. Physical Setting Sources

### 4.3.1. Aerial Photographs

Aerial photographs of selected years between 1954 and 2019 (available on-line from the University of Toronto Libraries Aerial Photographs and Google Earth Historical Imagery) were reviewed to provide a chronological timeline of developmental changes at the Site and within the Study Area. The aerial photographs are enclosed in Appendix F.

**Table 4.3.1-1 Summary of Aerial Photographs Review**

Year	Notable Changes or Environmental Issues
1954	<ul style="list-style-type: none"> <li>- The Study Area appeared to be vacant land. Notable developments were Ottawa Street to the south and Appleton Side Road to the southwest.</li> <li>- No evidence of development was observed for the Site.</li> </ul>
2005	<ul style="list-style-type: none"> <li>- The Site appeared to be developing with a commercial building similar to the existing structure with a parking lot on the south side of the property and a driveway along the east and north site boundaries.</li> <li>- The surrounding properties to the east, south and west appears to be developed as commercial buildings similar to the existing structures with parking areas and driveways surrounding the buildings. The surrounding area to the north remained as vacant land.</li> </ul>

Year	Notable Changes or Environmental Issues
2010	<ul style="list-style-type: none"> <li>- No major changes were observed for the Site.</li> <li>- The neighbouring property to the east appeared to be developed with a commercial building similar to the existing structure with a parking area and driveways on the south side of the property. The parking area for the property to the south was expanded and a commercial building was developed southeast of the Site. No additional major changes were observed for the Study Area.</li> </ul>
2018	<ul style="list-style-type: none"> <li>- No major changes were observed for the Site.</li> <li>- The surrounding areas to the north were developing with new road and residential subdivisions. No additional major changes were observed for the Study area.</li> </ul>
2019	<ul style="list-style-type: none"> <li>- No major changes were observed for the Site and Study Area.</li> </ul>

### 4.3.2. Topography, Hydrology, and Geology

#### Topography and Regional Drainage

Based on the topographic map, Natural Resources of Canada – The Atlas of Canada – Toporama, regional groundwater flow direction is inferred to be northwest towards Ottawa River located approximately 25 Km northwest of the Phase One Property. The closer water body to the Phase One Property is Mississippi River, located approximately 1 Km south of the Site. Mississippi River flows northwest and drains into Ottawa River.

As indicated on the topographic map, the average elevation of the Phase One Property is approximately 140 m above mean sea level. The mapped contours for the Phase One Property and surrounding areas indicate a downward slope to the south direction towards Mississippi River.

It should be noted that local groundwater flow direction can only be determined through on-going monitoring of groundwater levels, and that groundwater flow at the Phase One Property may be influenced by underground utility corridors or structures.

#### Physiography and Geology of the Phase One Study Area

According to the Ontario Geophysical Survey “OGS Earth” application, the Phase One Study Area is situated within the physiographic region of Ottawa Valley Clay Plains, which comprises clay plains. The surficial geology in the area was identified as Paleozoic bedrock. The bedrock geology under the Phase One Property consists of limestone, dolostone, shale, arkose and sandstone of the Ottawa Group; Simcoe Group; Shadow Lake Formation. The depth to the bedrock is unknown.

#### 4.3.3. Fill Materials

No changes in topography were evident in the reviewed aerial photographs or the topographic maps. However, due to the age of the Phase One Property development, the potential presence of fill material is anticipated at the Site.

#### 4.3.4. Water Bodies, Areas of Natural Significance & Ground Water Information

The close water body to the Phase One Property is Mississippi River, located approximately 1 Km south of the Site. Mississippi River flows northwest and drains into Ottawa River. Based

on information provided on the Ministry of Natural Resources and Forestry (MNR) on-line application “Make A Map: Natural Heritage Areas”, the Phase One Property is not located within or adjacent to an area of natural and scientific interest (ANSI), or within a provincially significant wetland; however, a woodland area was identified adjacent to the Phase One Property to the northeast.

Based on the Source Protection Information Atlas mapping website, the Phase One Property is located in a wellhead protection area B; however, it is not located in an area of significant groundwater recharge or wellhead protection area E (GUDI). The Phase One Property is municipally serviced by the Town of Mississippi Mills, with drinking water that was derived from Nepean Sandstone Aquifer.

### 4.3.5. Well Records

Based on the review of the Government of Ontario Well Record Map and the ERIS report, there were no well records for the Site; however, seven (7) well records were reported within the Study Area. No information was available on the bedrock depth. The following is a summary of the information for wells identified within the vicinity of the Site (i.e., within approximately 150 m of the Site).

**Table 4.3.5-1: Summary of Well Records**

Well Location (approximate distance from centroid of Site)	Well Status, Completed Date	Stratigraphy*	Depth to Bedrock	Depth to Water Table
Lot 14 Con 10  45 m southeast of Site	Water Supply 10/28/1950	0-19 ft Fill 19-75 ft Limestone	Not reported	75 ft below ground surface (bgs)
Hwy #44 (March Road) Lot 15 Con 10	Abandoned-Other 8/29/2007	Not reported	Not reported	Not reported

### 4.4. Site Operating Records

The Site is not defined as an Enhanced Investigation Property. Therefore, Site Operating Records that are applicable or specific for an industrial property, a commercial garage, a bulk liquid dispensing facility, or a dry-cleaning equipment operator were not included in this Phase One ESA.

## 5.0 INTERVIEWS

A questionnaire interview was sent on March 1, 2021 to Mr. David Osypowich, the owner of the Phase One Property. Relevant information obtained from the questionnaire interview is summarized below:

**Table 5.0-1: Summary of Interview Information**

Name and Position	Date of Interview	Method of Interview	Relevant Information
Mr. David Osypowich Owner	March 1, 2021	Questionnaire	<ul style="list-style-type: none"> <li>• Mr. Osypowich reported that the current owner of the property is 2241497 Ontario Ltd.</li> <li>• Mr. Osypowich mentioned that he has been involved with the property for 5 years.</li> <li>• Mr. Osypowich reported that the on-site structures were developed circa 2007 and that no additions or demolition have occurred ever since.</li> <li>• Mr. Osypowich mentioned that he is unsure about any importation of fill material to the Phase One Property.</li> <li>• Mr. Osypowich reported that no underground storage tanks or above storage tanks were ever used on the Phase One Property.</li> <li>• Mr. Osypowich informed that there are no hazardous wastes generated on the Phase One Property and that he is not aware of any environmental problem in the surrounding properties.</li> <li>• Mr. Osypowich reported that the future land use of the Phase One Property will be mixed use (commercial / residential).</li> </ul>

## 6.0 SITE RECONNAISSANCE

### 6.1. General Requirements

The site visit was conducted by Mr. Mamoon Herz-Khan, BES of *Toronto Inspection Ltd.* The Phase One Property and neighbouring properties were visited on March 5, 2021. General information pertaining to the site visit is present as follows:

**Table 6.1-1: Site Reconnaissance General Notes**

Date, Time, and Length of Time of Investigation	Weather Conditions	Is Facility in Operation at Time of Investigation (applicable to Enhanced Investigation Property)	Names and Qualifications of Persons Conducting the Investigation
March 5, 2021 09:30 am – 11:00 am	Clear Temperature: -12°C	Not applicable	Mamoon Herz-Khan, BES

Photographs taken during the site visits are included in Appendix G.

### 6.2. Specific Observations at Phase One Property

#### 6.2.1. General Site Layout and Operations

##### ***Topographic, Geologic, and Hydrogeologic Conditions***

At the time of the site reconnaissance, external areas within the Phase One Property were observed to be concrete paved with some sections of the ground partially covered with snow. In general, the Phase One Property was relatively flat in relation to neighbouring properties. Surface drainage is expected to flow towards catch basins located within the paved area on Site or flow towards catch basins located along Ottawa Street.

The topographic features and surface gradient are expected to influence shallow groundwater flow at the Phase One Property and within adjacent/neighbouring lands. Also, ground water flow at the Phase One Property may be influenced by underground utility corridors or structures.

##### ***General Description of Structures***

The Phase One Property was occupied by a 2-storey commercial building with no basement. The Subject Building was serviced by 5 main entrances and 14 secondary entrances at the rear of the building. The Subject Building was composed by a concrete foundation, stone exterior finish and shingle roof.

##### ***Property Use***

At the time of the site reconnaissance, the Phase One Property was occupied by a retail mall and activities associated with an enhanced investigation property were not identified.

##### ***Products Manufactured***

No manufacturing of products was observed on the Phase One Property at the time of the site reconnaissance.

### ***Vehicle and Equipment Maintenance Areas***

No vehicle and equipment maintenance areas were observed on the Phase One Property at the time of the site reconnaissance.

### **6.2.2. Utilities Services**

At the time of the site reconnaissance, the Phase One Property was serviced by hydro, natural gas, municipal water and storm sewers.

### **6.2.3. Potable Water Supply**

At the time of the site reconnaissance, the Phase One Property was municipally serviced by the Town of Mississippi Mills, with drinking water that was derived from Nepean Sandstone Aquifer.

### **6.2.4. Wells**

#### ***Water Wells***

There was no evidence of water wells on the Phase One Property at the time of the site reconnaissance.

#### ***Monitoring or Observation Wells***

There was no evidence of monitoring or observation wells on the Phase One Property at the time of the site reconnaissance.

### **6.2.5. Waste Generation and Management**

#### ***Solid and Liquid Waste Management***

Waste generated on the Phase One Property was limited to general waste from retail businesses (i.t. cardboard, office waste, general refuse). Stanley Sanitation Ltd. garbage bins were located at the north portion of the property.

#### ***Sewage Disposal***

Wash or wastewater from kitchen sinks or bathrooms was discharged into the municipal sanitary sewage.

#### ***Wastewater***

No industrial wastewater was generated on the Phase One Property at the time of the site reconnaissance.

#### ***Liquid Discharge Points***

No liquid discharge points were observed on the Phase One Property at the time of the site reconnaissance.

### ***By-Products and Wastes***

No by-products or wastes were observed on the Phase One Property at the time of the site reconnaissance.

## **6.2.6. Materials Handling and Storage**

### ***Hazardous Materials***

No hazardous materials were observed on the Phase One Property at the time of the site reconnaissance.

### ***Unidentified Substances***

No unidentified substances were observed on the Phase One Property at the time of the site reconnaissance.

### ***Raw Materials Handling and Storage***

No raw material handling or storage was observed on the Phase One Property at the time of the site reconnaissance.

### ***Storage Containers***

No storage containers were observed on the Phase One Property at the time of the site reconnaissance.

## **6.2.7. Storage Tanks**

### ***Aboveground Storage Tanks (ASTs)***

No ASTs were observed on the Phase One Property at the time of the site reconnaissance.

### ***Underground Storage Tanks (USTs)***

No vents or pipes indicating the presence of a UST were found in visible areas of the Phase One Property during the site reconnaissance.

It should be noted that the presence of USTs cannot be confirmed or refuted based on visual inspections or review of historical documents available to *Toronto Inspection Ltd.* at the time of this Phase One ESA.

## **6.2.8. Odours and Air Emissions**

No offensive odour or detectable sources of air emissions that may impact the ambient air quality on the Phase One Property were observed during the site reconnaissance.

### **6.2.9. Spills, Stains and Stained Materials**

No evidence of spills, staining or stained material was observed in the visible areas of the Phase One Property during the site reconnaissance.

### **6.2.10. Below-ground Structures**

#### ***Oil and Water Separators***

No oil and water separators were observed on the Phase One Property at the time of the site reconnaissance.

### **6.2.11. Interior Observations**

#### ***General***

The interior of the Subject Building was finished with gypsum walls, PCV wall covering, suspended ceiling, tile floors, carpet floors and unfinished concrete floors.

#### ***Heating and Cooling Systems***

Heating was provided to the Subject Building via natural gas-fired forced air units. The cooling was provided via A/C units.

#### ***Drains, Pits and Sumps***

No pits or swamps were present within the Phase One Property. Drains were present in the washrooms. No stains were observed in the vicinities of the drains.

#### ***Mechanical Equipment***

No mechanical equipment was observed on the Phase One Property at the time of the site reconnaissance.

### **6.2.12. Exterior Observations**

#### ***Pits and Lagoons***

No natural pit or lagoon was observed on the Phase One Property at the time of the site reconnaissance.

#### ***Stressed Vegetation***

No stressed vegetation was observed on the Phase One Property at the time of the site reconnaissance.

#### ***Fill and Debris***

At the time of the site reconnaissance, no piles of fill material or debris were observed on the Phase One Property.

### ***Watercourses, Ditches, or Standing Water***

No watercourses, ditches or standing water were observed on the Phase One Property at the time of the site reconnaissance.

### ***Roads, Parking Facilities, and Rights-of-way***

The Phase One Property was accessible via Ottawa Street, located to the south of the Phase One Property. A parking area was observed in front of the Subject Building and it was accessed via Ottawa Street.

### ***Railway Lines or Spurs***

No evidence of current or former railway lines or spurs was identified on the Phase One Property at the time of the site reconnaissance.

### **6.2.13. Potentially Contaminating Activity Observed on Phase One Property**

No potentially contaminating activity was observed on the Phase One Property at the time of the site reconnaissance.

### **6.2.14. Special Attention Items**

#### ***Polychlorinated Biphenyls (PCBs)***

Polychlorinated Biphenyls (PCBs) were first commercially used as an insulation/cooling fluid in 1929 in North America. PCBs are generally found in transformers, light ballasts, and other electrical equipment that contain insulating fluids that were manufactured between 1929 and 1977. The use of the PCBs in electrical equipment was banned in 1997.

Reportedly, the Subject Building was developed in the mid-2000s; therefore, PCB-containing ballasts are not likely to be present within the Site.

#### ***Asbestos-Containing Materials (ACMs)***

Asbestos had been used in building construction as fire retardant and insulation materials. Although the use of asbestos in building material was halted in the late-1970's, asbestos can still be found in a variety of construction materials such as: pipe and pipe elbow insulation; vinyl floor tiles; suspended ceiling tiles; insulation around boilers; stucco ceiling materials; drywall compound.

Reportedly, the Subject Building was developed in the mid-2000s; therefore, ACMs are not likely to be present within the Site.

### ***Lead***

Old paints are known to contain lead, which is defined as one of the Designated Substances under the Ontario Occupational Health and Safety Act – Section 30. Lead was used in oil-based paints as a drying agent and pigmentation. The use of lead-based paints was phased out in 1976. The potential for exposure to lead-based paints and the dust associated with the deterioration or removal of lead-based paint can pose a health risk to humans, especially to children.

Reportedly, the Subject Building was developed in the mid-2000s; therefore, lead-based paints are not likely to be present within the Site.

### ***Ozone-Depleting Materials***

Refrigeration units such as freezers, and A/C units were observed on the Phase One Property at the time of the site reconnaissance. These units may contain ozone depleting substances and must be serviced by licensed technicians.

### ***Urea Foam Formaldehyde Insulation (UFFI)***

No evidence of UFFI was observed on the Phase One Property at the time of the site reconnaissance.

### ***Noise and Vibration***

The Phase One Property is located to the north of Ottawa Street in commercial / residential area in Almonte, Ontario; therefore, noise and moderate vibrations generated by vehicles are to be expected.

### ***Electric and Magnetic Field***

No high voltage transmission towers or substations generating electric or magnetic fields were suspected on the Phase One Property or on the adjacent properties.

## **6.3. Adjacent and Neighbouring Properties Observations**

Occupants and/or land usage of the adjacent and neighbouring properties at the time of the site reconnaissance include the following:

### ***Adjacent Properties***

The adjacent property uses (excluding municipal rights-of-way) observed at the time of the site reconnaissance are summarized in Table 6.3-1.

**Table 6.3-1: Observations of Areas Adjacent to Phase One Property**

Address / Orientation	Owner / Occupant	Observations
North of the Site  336-380 Honeyborne Street	Private Residential	The adjacent properties to the north consisted of residential developments.  No evidence of potential environmental concern was observed.
East of the Site  476 Ottawa Street	Levi Home Hardware Building Centre	The adjacent properties to the east consisted of a commercial development.  No evidence of potential environmental concern was observed.
South of the Site  451 and 453 Ottawa Street	Equator Coffee Roasters Subway Dandelion Foods RBC Bank	Beyond Ottawa Street, the properties were occupied by commercial developments.  No evidence of potential environmental concern was observed.
West of the Site  105 Sadler Drive	Tim Hortons	Adjacent properties to the west consisted of a commercial development.  No evidence of potential environmental concern was observed.

### **Neighbouring Properties**

The neighbouring property uses (excluding rights-of-way) observed at the time of the site reconnaissance are summarized in Table 6.3-2.

**Table 6.3-2: Observations of Neighbouring Properties**

Location	Land Use	Observations
<i>North</i>	Residential	- Neighboring properties to the north, beyond Honeyborne Street consisted of residential lands.  No evidence of potential environmental concern was observed
<i>East</i>	Commercial	- Neighboring properties to the east consisted of commercial developments.  Ultramar gas station was observed at 5525 Appleton Side Road, approximately 205 m east of the Phase One Property.
<i>South</i>	Commercial	- Neighboring properties to the south consisted of commercial developments.  Francis Fuels gas station was observed at 365 Ottawa Street, approximately 200 southwest of the Phase One Property.

Location	Land Use	Observations
West	Commercial	- Neighboring properties to the west, consisted of commercial developments  No evidence of potential environmental concern was observed

### 6.3.1. Potentially Contaminating Activity Observed in Study Area

Potentially contaminating activities associated with the current and/or historical use of the properties within the Study Area, as identified during the site visit are listed as follows:

**Table 6.3.1-1 PCAs Relating to Current and/or Historical Uses in Study Area**

Location	Source of Environmental Issues	Potentially Contaminating Activity
East of the Site  5525 Appleton Side Road (approximately 205 m east of the Site)	Ultramar gas station	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks
Southwest of the Site  365 Ottawa Street (approximately 200 m southwest of the Site)	Francis Fuels gas station	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks

### 6.3.2. Enhanced Investigation Property

The Phase One Property is not currently being used or has ever been used for industrial purposes, or as a garage, a bulk liquid dispensing facility including a gasoline outlet, or a facility where dry cleaning equipment operated; therefore, the Phase One Property is not considered an enhanced investigation property.

### 6.4. Written Description of Investigation

Investigations of the Phase One Property and Phase One Study Area were carried out in accordance with Schedule D of O. Reg. 153/04 as amended. Written description detailing each investigation is provided in Section 6.2 *Specific Observations at Phase One Property* and Section 6.3 *Adjacent and Neighbouring Properties Observations*. Findings that are relevant to identified PCAs on the Site and within the Study Area are provided in Sections 6.2.13 and 6.3.1.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1. Current and Past Uses

A summary description of the current and past uses of the Phase One Property to its first developed use is provided in Table 7.1-1, below.

**Table 7.1-1: Current and Past Uses of the Phase One Property**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans Etc.
1954	Private Owner	Agricultural or other	Agricultural or other	According to the 1954 the Phase One Property was undeveloped and it appeared to be part of agricultural fields.
2005-2016	Various Privates Owners	Commercial	Commercial	Reportedly, the Subject Building was developed in the mid-2000s as a retail mall. The Subject building has been used for commercial purposes since development.
2016-present	2241497 Ontario Limited	Commercial	Commercial	As reported by Mr. Osypowich, the current owner of the Phase One Property is 2241497 Ontario Limited. The property remains as commercial.

### 7.2. Potentially Contaminating Activity

Based on the findings from records review, site reconnaissance and interviews, the Phase One ESA has revealed the following PCA within the Phase One Property:

**Table 7.2-1: Potentially Contaminating Activities Within the Phase One Study Area**

Location	Potential Environmental Concerns	Potentially Contaminating Activity (Table 2, Schedule D of O.Reg. 153/04)	Potential to Impact Site
105 Sadler Drive <i>Adjacent to the west of the Site</i>	A spill incident was reported to the MOE in 7/8/2019 due to a leak of 9 L of hydraulic oil from Waste Management truck.	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	<b><u>Anticipated to be low,</u></b> based on the amount of the spill and the downgradient orientation of the property
5525 Appleton Side Road <i>Approximately 205 m east of the Site</i>	The property is occupied by Ultramar Gas Station.  The following tanks were reported as active on the property:  Two (2) 60000 L gasoline double wall UST; One (1) 35000 L gasoline double wall UST and 25000 L diesel double wall UST  The property was reported as a waste generator of waste oils/sludges (petroleum based) (2017-2020)	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	<b><u>Anticipated to be low,</u></b> based on distance and gradient of the property

Location	Potential Environmental Concerns	Potentially Contaminating Activity (Table 2, Schedule D of O.Reg. 153/04)	Potential to Impact Site
365 Ottawa Street  <i>Approximately 200 m southwest of the Site</i>	<p>The property is occupied by Francis Fuels Gas Station.</p> <p>A spill incident was reported to the MOE in 2/3/1994 due to a container overflow resulting in 20 L of gasoline to ground</p> <p>A spill incident was reported to the MOE in 6/1/1994 due to a valve/fitting leak or failure resulting in 1 L of gasoline to apron when hose ruptured. Environmental impact is not anticipated.</p> <p>A License was issued in 9/3/2002 for the operation of Retail Fuel Outlet and three (3) 25000 L gasoline single wall UST and one (1) 25000 L diesel single wall UST</p>	PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	<p><b><i>Anticipated to be low</i></b>, based on distance and gradient of the property</p>

The PCAs identified above are presented on Figure No. 2, Appendix A.

### 7.3. Areas of Potential Environmental Concern

No Areas of Potential Environmental Concern (APECs) were identified within the Phase One Property based on the findings of this Phase One ESA as shown on Figure No. 3, Appendix A.

### 7.4. Phase One Conceptual Site Model

A Conceptual Site Model (CSM) was developed as part of this Phase One ESA. The CSM consists of figures of the Phase One Study Area which include the inferred ground water flow, Potentially Contaminating Activities (PCAs) within the Study Area, and Land Usage for the surrounding areas. Based on the records review, and information assessed at the time of this Phase One ESA, no potentially contaminating activities (PCAs) were identified within the Phase One Property and only three (3) PCAs were identified within the Study Area; however, none of the PCAs in the Study Area were identified to represent an area of potential environmental concern (APEC) at the Phase One Property.

#### 7.4.1. Site Overview

The Phase One Property is a rectangular-shaped property located north of Ottawa Street and approximately 50 m east of Sadler Drive in Almonte, Ontario. The Phase One Property, with an approximate area of 2.5564 ha, is developed with a commercial building. Based on the records review, the Phase One Property was considered to have been first developed in the mid-2000s for commercial purposes.

#### 7.4.2. Physical Setting of Phase One Property

##### ***Regional Geological and Hydrogeological Information***

Based on the topographic map, Natural Resources of Canada – The Atlas of Canada – Toporama, regional groundwater flow direction is inferred to be northwest towards Ottawa River

located approximately 25 Km northwest of the Phase One Property. The closer water body to the Phase One Property is Mississippi River, located approximately 1 Km south of the Site. Mississippi River flows northwest and drains into Ottawa River.

As indicated on the topographic map, the average elevation of the Phase One Property is approximately 140 m above mean sea level. The mapped contours for the Phase One Property and surrounding areas indicate a downward slope to the south direction towards Mississippi River.

According to the Ontario Geophysical Survey “OGS Earth” application, the Phase One Study Area is situated within the physiographic region of Ottawa Valley Clay Plains, which comprises clay plains. The surficial geology in the area was identified as Paleozoic bedrock. The bedrock geology under the Phase One Property consists of limestone, dolostone, shale, arkose and sandstone of the Ottawa Group; Simcoe Group; Shadow Lake Formation. The depth to the bedrock is unknown.

### ***Water Bodies and Areas of Natural Significance in Phase One Study Area***

The close water body to the Phase One Property is Mississippi River, located approximately 1 Km south of the Site. Mississippi River flows northwest and drains into Ottawa River. Based on information provided on the Ministry of Natural Resources and Forestry (MNR) on-line application “Make A Map: Natural Heritage Areas”, the Phase One Property is not located within or adjacent to an area of natural and scientific interest (ANSI), or within a provincially significant wetland; however, a woodland area was identified adjacent to the Phase One Property to the northeast.

### ***Phase One Property Topographic, Geologic, and Hydrogeologic Conditions***

At the time of the site reconnaissance, external areas within the Phase One Property were observed to be concrete paved with some sections of the ground partially covered with snow. In general, the Phase One Property was relatively flat in relation to neighbouring properties. Surface drainage is expected to flow towards catch basins located within the paved area on Site or flow towards catch basins located along Ottawa Street.

The topographic features and surface gradient are expected to influence shallow groundwater flow at the Phase One Property and within adjacent/neighbouring lands. Also, ground water flow at the Phase One Property may be influenced by underground utility corridors or structures.

### ***Fill Materials***

No changes in topography were evident in the reviewed aerial photographs or the topographic maps. However, due to the age of the Phase One Property development, the potential presence of fill material is anticipated at the Site.

### ***Drinking Water Wells at the Phase One Property***

No drinking water wells were observed on the Phase One Property at the time of the site reconnaissance.

### ***Proposed Property Use at the Phase One Property***

The proposed land use for the Phase One Property is mixed usage (commercial / residential).

### **7.4.3. Sources of Contamination**

#### ***Potentially Contaminating Activity***

Three (3) potentially contaminating activities (PCAs) were identified within the Study Area; however, none of them were identified to create an Area of Potential Environmental Concern at the Phase One Property. The locations of the PCAs within the Study Area are shown on Figure No.2 and it is summarized in Table 7.2-1.

#### ***Areas of Potential Environmental Concern***

No Areas of Potential Environmental Concern (APECs) were identified within the Phase One Property.

### **7.4.4. Uncertainty or Absence of Information**

There is no known data gap identified that significantly affects the findings of this Phase One ESA.

## 8.0 CONCLUSIONS

In summary, the historical and current activities from on-Site and off-Site properties, as identified at the time of this Phase One ESA, do not represent significant potential environmental concern which may adversely impact the subsurface conditions of the Phase One Property.

It is *Toronto Inspection Ltd.*'s opinion that at the time of writing this Phase One ESA report, based on a review of the available documents and information that no further investigation i.e., Phase Two ESA is recommended for the Phase One Property.

## 10.0 GENERAL STATEMENT OF LIMITATION

This Phase One Environmental Site Assessment was conducted in general compliance with currently acceptable practices for environmental site investigations, and specific client requests, as applicable to this property. It is based on documents and oral information supplied to *Toronto Inspection Ltd.* There is no warranty expressed or implied or representations by *Toronto Inspection Ltd.* that this investigation uncovered all potential environmental risks or liabilities associated with the subject site.

This report was prepared by *Toronto Inspection Ltd.* for the account of 2241497 Ontario Limited. The material in this report reflects *Toronto Inspection Ltd.*'s judgement in light of the information available to them at the time of preparation. Any use which a Third Party makes of this report, or any reliance on decisions to be made based on it, is the responsibility of these Third Parties. *Toronto Inspection Ltd.* accepts no responsibility for damages, if any, suffered by any Third Party as a result of decisions made or actions based on this report.

*Toronto Inspection Ltd.* did not provide any service to investigate or detect the presence of moisture, mould or other biological contaminants in or around any structure, or any service that was designed or intended to prevent or lower the risk of the occurrence of the amplification of the same. Mould is ubiquitous to the environment with mould amplification occurring when building materials are impacted by moisture. Site conditions are outside of *Toronto Inspection Ltd.*'s control, and mould amplification will likely occur, or continue to occur, in the presence of moisture. As such, *Toronto Inspection Ltd.* cannot and shall not be held responsible for the occurrence or recurrence of mould amplification.

Any legal actions arising directly or indirectly from this work and/or *Toronto Inspection Ltd.*'s performance of the services shall be filed no longer than two years from the date of *Toronto Inspection Ltd.*'s substantial completion of the services. *Toronto Inspection Ltd.* shall not be responsible to the client for lost revenues, loss of profits, cost of content, claims of customers, or other special indirect, consequential, or punitive damages.

To the fullest extent permitted by law, the client's maximum aggregate recovery against *Toronto Inspection Ltd.*, its directors, employees, sub-contractors and representatives, for any and all claims by the client for all causes including, but not limited to, claims of breach of contract, breach of warranty and/or negligence, shall be limited to the amount of professional fees paid by the client.

Yours sincerely,  
**Toronto Inspection Ltd.**

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Dec 31, 2020**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2018**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Dec 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Dec 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2020**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Jan 31, 2020**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Jan 31, 2020**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Dec 31, 2020**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Oct 31, 2020**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Sep 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2020**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Jan 31, 2020**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

<b><u>Pesticide Register:</u></b>	Provincial	<b>PES</b>
The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.		
<b>Government Publication Date: Oct 2011-Dec 31, 2020</b>		
<b><u>Pipeline Incidents:</u></b>	Provincial	<b>PINC</b>
List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.		
<b>Government Publication Date: Oct 31, 2020</b>		
<b><u>Private and Retail Fuel Storage Tanks:</u></b>	Provincial	<b>PRT</b>
The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).		
<b>Government Publication Date: 1989-1996*</b>		
<b><u>Permit to Take Water:</u></b>	Provincial	<b>PTTW</b>
This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.		
<b>Government Publication Date: 1994-Jan 31, 2020</b>		
<b><u>Ontario Regulation 347 Waste Receivers Summary:</u></b>	Provincial	<b>REC</b>
Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.		
<b>Government Publication Date: 1986-2016</b>		
<b><u>Record of Site Condition:</u></b>	Provincial	<b>RSC</b>
The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.		
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).		
<b>Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2021</b>		
<b><u>Retail Fuel Storage Tanks:</u></b>	Private	<b>RST</b>
This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.		
<b>Government Publication Date: 1999-Dec 31, 2020</b>		
<b><u>Scott's Manufacturing Directory:</u></b>	Private	<b>SCOT</b>
Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.		
<b>Government Publication Date: 1992-Mar 2011*</b>		
<b><u>Ontario Spills:</u></b>	Provincial	<b>SPL</b>
List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.		
<b>Government Publication Date: 1988-Mar 2020; Jul 2020 - Aug 2020</b>		

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Dec 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**Appendix C      MECP Freedom of Information**

# Property Assessment Notice

For the 2020  
property taxation year

**THIS IS NOT A TAX BILL.**

The Municipal Property Assessment Corporation (MPAC) is responsible for assessing and classifying more than five million properties in Ontario in compliance with the *Assessment Act* and regulations set by the Government of Ontario.

**MPAC's updated value of your property is \$4,373,000**

**Account information:**

Roll Number	09 31 929 025 29405 0000
<b>AboutMyProperty™ Access Key</b>	<b>7HQ8G2HW55VD</b>
Your property's location and description	430 OTTAWA ST RAMSAY CON 10 PT LOT 16 RP 27R8445 PARTS 1 TO 4 9 TO 11 RP 27R8990 PART 1
Municipality	MISSISSIPPI MILLS MUNICIPALITY
School support – see Attachment (1)	

**Assessment overview:**

MPAC's assessed value of your property as of <b>January 1, 2016</b>	\$4,373,000
MPAC's assessed value of your property as of <b>January 1, 2012</b>	\$4,076,000
Between <b>2012</b> and <b>2016</b> , your property's assessed value changed by	\$297,000

If you disagree with your assessment or classification, you can file a Request for Reconsideration and MPAC will review your assessment, free of charge. You also have the option to file an appeal with the Assessment Review Board (ARB). For more information visit [www.aboutmyproperty.ca](http://www.aboutmyproperty.ca).

**How will my municipality use MPAC's property assessment?**

Under the phase-in provision in the *Assessment Act*, an increase in assessed value is introduced gradually. A decrease in assessed value will be introduced immediately. The January 1, 2016 assessed value and classification of your property will be used as the basis for calculating your 2020 property taxes.

Tax Year	Total Assessed Value	Request for Reconsideration Deadline	ARB Appeal Deadline*
2020	\$4,373,000	March 31, 2020	March 31, 2020

\*If you submit a Request for Reconsideration, the last day to file an appeal is 90 days after the issue date listed on the Request for Reconsideration results letter you receive from MPAC.

**\*\*\* Please see Attachment (1) for the breakdown of your assessment for each property classification associated with your property. \*\*\***

To learn more about how your property was assessed, see the information on page 2 of this Notice. For more information on the Request for Reconsideration process, property assessment and taxation, visit [www.aboutmyproperty.ca](http://www.aboutmyproperty.ca).

**This Property Assessment Notice has important information for you as a property owner.**

Please review it and file it away for your records.

**No action is required**

unless you disagree with your assessment.

**CONTACT US**

1 866 296-MPAC (6722)  
TTY 1 877 889-MPAC (6722)  
Monday to Friday  
8 a.m. to 5 p.m.

If you have accessibility needs, please call us for assistance.

[www.aboutmyproperty.ca](http://www.aboutmyproperty.ca)

## How does MPAC assess my property?

Our assessors are trained experts in the field of valuation and apply appraisal industry standards and best practices. **Three common approaches** are used to determine the current value of a property:

Direct (Sales) Comparison Approach

Cost Approach

Income Approach

Roll Number: 09 31 929 025 29405 0000

Property summary:

Property type: Neighbourhood shopping centre, no anchor

Property information: Lot area: 6.30 acres

To establish the Current Value Assessment for properties in Ontario, MPAC typically collects cost and income data, and analyzes sales. Current Value Assessment is used by most assessment jurisdictions in North America. MPAC's assessments and data are also used by banks, insurance companies and the real estate industry.

To learn more about how MPAC assesses property and/or to see the details MPAC has on file for your property, visit [www.aboutmyproperty.ca](http://www.aboutmyproperty.ca). Methodology Guides and Market Valuation Reports are also available on the site, free of charge.

## Have questions about your assessment?

Register and log in to [www.aboutmyproperty.ca](http://www.aboutmyproperty.ca) to learn more about how your property was assessed, see the information we have on file, as well as compare it to others in your area. You can register using the **Roll Number** and **Access Key** found on page 1 of this Notice.

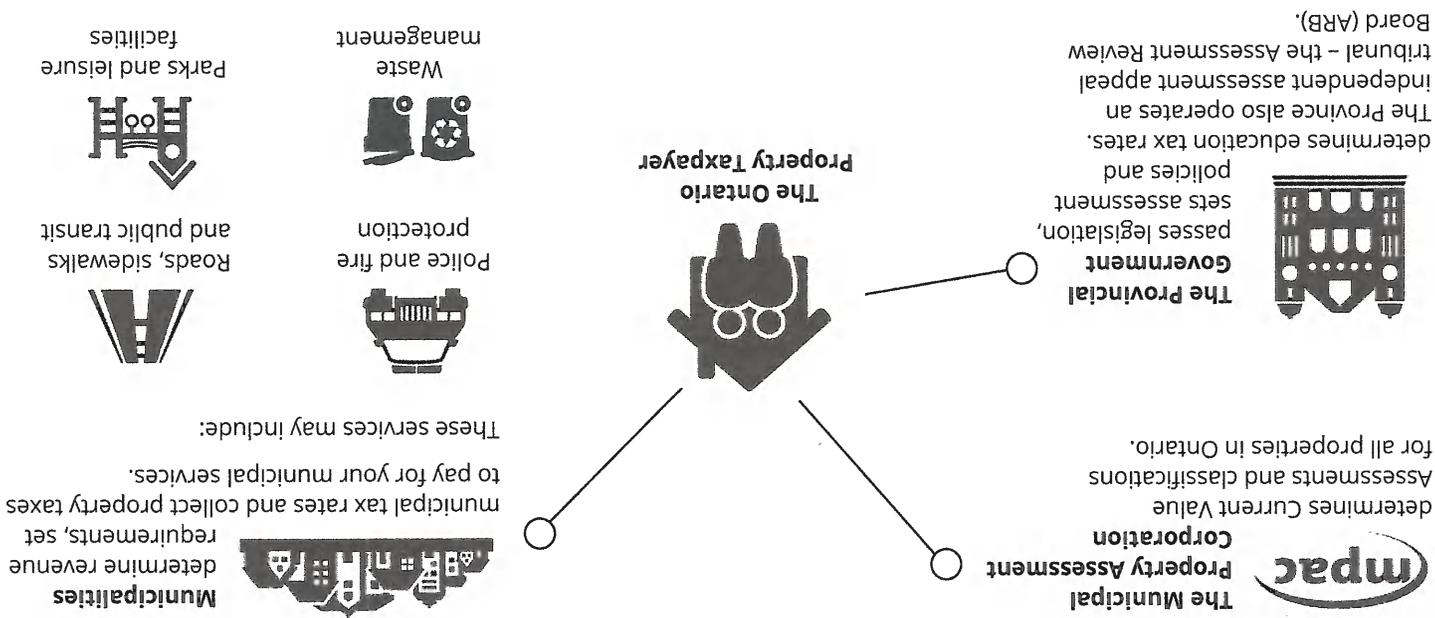

### Have questions?

We're here to help. Contact us at 1 866 296-6722 and one of our property assessment experts will help guide you through your Notice. Have a question about your property taxes? Contact your municipality for assistance.

### Still not sure about your property's assessed value?

You can file a Request for Reconsideration and MPAC will review your assessment, free of charge. You also have the option to file an appeal with the ARB. Your Request for Reconsideration and appeal deadlines are listed on page 1 of this Notice.

## Ontario's property assessment system

## Attachment (1)

Call Number: 09 31 929 025 29405 0000

2

### How will my municipality use MPAC's property assessment?

---

Property Classification:	Assessed Value
	2020
Shopping Centre	\$1,998,800
Commercial	\$2,374,200
<b>Total</b>	<b>\$4,373,000</b>

If a portion of your property is classified in the residential, farm or managed forests property class, you must submit a Request for Reconsideration and receive its results, before submitting an appeal to the Assessment Review Board.

### School support
